Pharmacy Services

Pharmacy Services

By their very nature, pharmaceuticals require specialist handling and secure storage. What's more, with an often limited lifespan and a high value, it can be critical to ensure that stock movements of pharmaceutical products are accurately recorded.

At OCS Retail Support we provide a range of sector-specific services to the pharmaceutical industry. They include inventory and audit services, business valuations and professional assistance with business transfers.

Our knowledge and understanding of the unique challenges that face businesses in this sector has been gained over two decades, experience that today, makes us the UK's market leader.

Barcode scanning and manual stocktaking methods are used by staff recruited for their integrity and meticulous attention to detail. They are highly trained, and have experience of working within pharmaceutical production, distribution and healthcare environments.

Being equipped with the very latest handheld data-capture terminals, enables us to provide quick and efficient service, carried out with minimal disruption, resulting in the delivery of highly accurate data.

The market value of any business is determined not just by its assets, but by a wide range of other factors. And when it comes to retail pharmacy, making an accurate real-time assessment requires specialist knowledge. At OCS, we have both the experience and professional expertise to provide business valuations and to act as an agent in the sale or transfer of pharmacy businesses.

So for a range of specialist services to assist your pharmaceutical business, you can count on OCS Retail Support.
