

International *Facilities* Services

*Store Support*

*Stock Management*

## *Stock Management*

OCS Retail Support has a proven track record of stock support for retail change management. Whether it is de-stocking; re-stocking; stock data management; goods receiving; or reverse logistics, we can offer a comprehensive solution.

Teams have access to the latest RF technology and hand held data capture devices enabling information to be collected and relayed instantly from one location to another.

Our stock support teams are also well versed with the majority of electronic ordering systems and they are supported by an IT department capable of writing bespoke software solutions to meet the individual needs of our customers.

### *Specialist services include:*

*Stock Managers*
