Distribution & Pre-Retail Audits

Distribution & Pre-Retail Audits

With today's vast retail sector relying on just-in-time deliveries, distribution centres are a key part of the supply chain. Ensuring that they can supply the right products to the right stores, exactly when required, is vital to a successful retail operation.

At OCS Retail Support, from Goods In to Despatch, we can undertake thorough audits to ensure accuracy in each key area.

Our teams of highly trained audit personnel have extensive experience within retail warehousing and distribution environments and can conduct thorough stock counts discreetly and without obstructing the day to day operation. In addition, we can provide highly experienced auditors to oversee in-house personnel to ensure accuracy, or even deliver training if required.

Our stock receiving audits check supplier deliveries at the Goods In point to ensure that consignment notes and invoices represent the stock received. We can conduct spot checks on order pickers to monitor and record both accuracy and speed. And when it comes to Goods Out, or Despatch, we can provide pre-retail auditing of deliveries to ensure that orders are correctly fulfilled.

Our services include:

Audit Procedure Compliance

Accuracy Audits

Mobile Audits

P.I. Counts

Picker Spot Checks

Pre Retail Audits

Compliance Auditing

Stock Error Verification

Barcode Error Verification

So choose OCS to ensure that your distribution centre always delivers the goods.
